-- FUNCTION: E7 protein has both transforming and trans-activating activities.
-- SIMILARITY: Belongs to the papillomaviruses E7 protein family.
                                                                                                                                                                                                                                                                                                 carcinoma of the uterine cervix.
